# TECHNOLOGY INTEGRATION

## Onsite, Offsite, & Offshore IT Solutions

### Review List

As a mortgage risk management firm, we have found that our clients often need proper IT implementation of applicable regulatory requirements. Consequently, we developed a comprehensive approach that includes not only a review of IT resources but also the means to build new e-commerce architecture. We have the unique ability to provide IT consulting, outsourced software development, staff augmentation, application testing, and IT project management services.

We help achieve a high level of regulatory compliance by offering a wide array of services:

- **Custom Application Development**
  - Developing new, customized applications engineered for a perfect fit
  - Maintaining & enhancing enterprise-critical applications
  - Increasing performance of legacy applications
  - Web-enabling for increased visibility and usability
  - Integrating new, re-engineered, reconfigured legacy systems
  - Redeploying a smoothly functioning body of enterprise applications
- **Staff Augmentation Services**
  - Take advantage of highly-skilled resources with substantial experience
  - Significantly reduce costs over the short- and long-term
  - Proven method for quickly matching specific IT staffing needs with the best possible candidates
  - Wide range of experience and specialized skill sets including project managers, system architects, developers, and consultants
- **Quality Assurance & Testing Services**
  - Improve the speed-to-market of new software products and services
  - Reduce the risk of critical application failures with low-cost, high-quality solutions
  - Identify and eliminate ambiguity and defects early in the software development lifecycle
  - Lower the cost of developing, testing and maintaining applications
- **Document Management Services**
  - Requirements analysis
  - System architecture and configuration management
  - Document management application development and customization
  - Hosted or on-premise platform options
  - Document Imaging / Document Scanning Services (onsite / offsite)
  - Optical Character Recognition (OCR)
  - Implementation, training and support
